

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A synthetic resin container having a craze pattern on a surface of a container body, said container comprising:
  - an inner layer that comes into direct contact with content during its storage;
  - a patterned layer carrying a craze pattern which has been formed by applying a solvent to the container body after a blow molding thereof; and
  - a translucent protective layer covering from outside at least part of the patterned layer carrying the craze pattern,wherein the patterned layer is comprised of a cyclic polyolefin resin, and the inner layer is comprised of a polyolefin resin or of a polyester resin.
2. (Canceled)
3. (Previously Presented) The synthetic resin container according to Claim 1, wherein the inner layer is applied with a color, and the patterned layer is transparent or semi-transparent.
- 4-6. (Canceled)
